

Our Design Process

7 Simple Steps to your Dream Brand

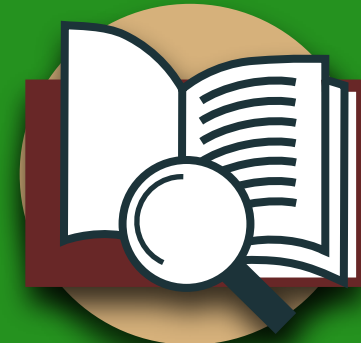

1 Meet & Brief

We learn about you, your vision and your goals. Your design request is received, and your project is started.

All consultations are done online via email or Whatsapp

3 Concepts & Initial Designs

The creative process takes over and we begin designing the initial concepts for your request. On average we make 5 different concepts for you to choose from.

2 Gather Research

Sit back and relax. We dive into your ideas and goals and find the best way to bring them to life.

4 Present Concepts

We regroup with you and present the concepts for review. This is the main iterative step whereby you can ask for any changes to a concept you would like to take further.

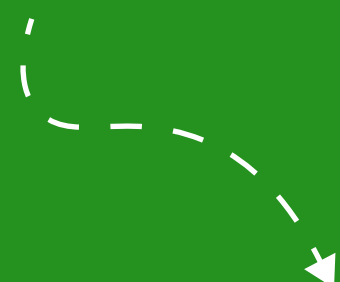

Want more changes? Go to step 5!

5 Revise Concepts

Back to the drawing board to implement what was discussed in Step 4. We add all the changes you want to bring you closer to achieving your brand goals.

*Happy with the design?
Proceed to step 6!*

6 Final Design

If you are happy with a design concept presented in Step 4, then we begin finalising it's design. We do the final touch ups and transform it into the final product.

We deliver your designs by email

7 Delivery

We deliver your completed design. You can choose which file types you would like your design to come in. Now you can take on your goals and dreams with your brand new design!
